Introduction.

This research has been conducted in order to gather some information about the automotive industry and community and will be used for an understanding of target users but also understanding the find more about the existing automotive platforms to help in the development of MecaLink.

1. Problems faced by vehicle owner with finding mechanics
 - Trust and transparency problem: many vehicle owners find it difficult to trust mechanics,
 - Experience or lack of knowledge
 - Higher pricing for low quality services. (trust in mechanics, fixxr 2024)
2. Problems mechanics face
 - Lack of visibility, can be skilled but not known by people
 - Lack of resources some time they just need small spare part to complete they work but it seems to be expensive as long as they can find something useful in the community. (trust in mechanics, fixxr 2024)
3. Location problems
 - When driving to unknown location it possible to face unexpected break down and not being able to locate a mechanic when need. (trust in mechanics, fixxr 2024)

- **Here are some question we found while doing our research**

- Anyone know any good mechanics around ucf era that won't try and scam you?
- Looking for the impossible - a genuinely honest and reliable (and inexpensive) car mechanic. Does this person exist? (community experience, reddit 2025)

- **Existing platforms for automotive**

- FIXXR is a south African platform that connect people from different regions in term of automobile to discuss their different difficulties and find a better place for the solution. (fixxr. 2018).
- AutoLNK is an automotive social platform allowing you to connect with anyone in the word through a global chatroom and specialise in automotive event. (street Aero says they used several tools for ticketing, map, which can make the user experience difficult. article 2026).

- **What MecaLink brings differently?**

- An easy to use platform
- A community for everyone ready to join
- A way of trusting mechanics
- A marketplace to share and find
- A chat platform for assistance
- An easy way to find help around.
